

# Nutrition Advice for Everyday Living

By Shannon Owens-Malett, MS, RD, LD

Grains

Fruits

Vegetables

Dairy

Meats & Beans

Oils

The human body is fueled by nutrients such as, protein, carbohydrate, fat, fiber, vitamins, minerals and water. These essential nutrients must be included in the diet to promote healthy body and mind and prevent chronic diseases such as heart disease, diabetes mellitus, high blood pressure, some cancers and premature death.

Having a balanced diet is the first step to getting a healthy lifestyle. Depending on your age and gender, you need a certain amount of each food group to achieve a balanced diet. The United States Department of Agriculture (USDA) food guide is helpful to show how many servings of each food group a person needs in a day.

## The Six Essential Food Groups

### Grains

Grains are the largest food group containing many different foods. There are whole grains and refined grains to choose from in this category. The best choices come from whole grains. Refined grains have been processed, which removes dietary fiber, iron and other nutrients. Good choices of whole grains include oatmeal, whole wheat pastas, breads, tortillas, crackers and brown rice.

It is recommended for adults to eat 6-8 servings of grains daily. Examples of a serving size:

- 1 oz grain = 1 slice of bread
- 4-5 crackers
- 7" tortilla
- ½ cup pasta, rice, oatmeal
- 1 cup dry cereal

### Fruits

The fruit food group includes any fruit and 100 percent fruit juice. It is best to avoid drinking too much fruit juice and consuming more of the whole piece of fruit to increase fiber and nutrients in the diet.

Adults should have 2 cups of fruit each day. Examples of a serving size:

- 1 cup of fruit: 1 cup fresh, frozen or canned
- 1 cup 100 percent fruit juice
- ½ cup dried fruit

## Vegetables

The vegetable food group contains any vegetable or 100 percent vegetable juice. This group is broken down into subgroups according to the USDA food guide:

- Dark green vegetables
- Orange vegetables
- Dried beans and peas
- Starchy vegetables
- Other vegetables

The dark green and orange vegetables and dried beans and peas category contain the most nutrition. Adults should include 3 cups of vegetables in their diet. Examples of vegetables:

- Dark green veg. – broccoli, spinach
- Orange veg. – carrots, sweet potato
- Dried beans and peas – cooked black, kidney, pinto beans
- Starchy veg. – potato, corn
- Other veg. – cauliflower, green beans, mushrooms, onions and tomatoes

Examples of a serving size:

- 1 cup of vegetables: 1 cup raw or cooked fresh, frozen or canned vegetables
- 1 cup 100 percent vegetable juice
- 2 cups leafy green vegetables

## Dairy

Another food group is milk foods that are high in calcium and most are made from milk. Foods included in this category are:

- All fluid milk
- Lactose-free milk
- Puddings made with milk
- Hard cheeses (cheddar, mozzarella, swiss, parmesan)
- Soft cheeses (ricotta, cottage cheese)
- Processed cheese (American)
- Yogurt

It is best to choose reduced-fat and fat-free milk products. Men and women should have 3 cups from the milk food group. Examples of a serving size:

- 1 cup milk or yogurt
- 1 ½ oz cheese (natural)
- 2 oz processed cheese

## Meats and Beans

Meats and beans are another food group that involves meat, poultry, fish, dried beans/peas, eggs, nuts and seeds. Lean meats should be chosen for a healthy diet. Fish, nuts and seeds contain essential fats and should be included as a balanced diet.

It is recommended that adults should consume 6 servings of meats and beans daily. Examples of a serving size:

- 1 oz = 1 oz of meat, poultry, pork, fish
- ¼ cup cooked dried beans
- 1 egg
- 1 tbsp peanut butter
- ½ oz nuts or seeds

## Oils

Oils are the final food group and include fats/oils and other foods, such as:

- Nuts
- Olives
- Avocados
- Mayonnaise
- Salad dressing
- Soft margarine

There are healthy types of oil that are good to include in the diet in small amounts. These healthy fats are mono and polyunsaturated oils because they are low in saturated fat. Unhealthy fats are coconut oil, palm oil and solid fats at room temperature such as butter, shortening and lard because they are high in saturated fat.

Another aspect of fat is trans fats, which are produced in foods that contain fats that were once liquid at room temperature and made solid or more saturated through food processing. It is important to choose foods that have no trans fats. The healthiest types of oil/fat include canola, olive, safflower, cottonseed, corn and sunflower oils, as well as nuts, olives and avocados. Reduced-fat margarine, salad dressing or mayonnaise with no trans fat can be a healthier choice.

This food group should be used in small amounts and limited to 6 servings daily. Examples of a serving size:

- 1 tsp oil
- 1 tsp margarine, mayonnaise
- 1 tbsp reduced-fat margarine or mayonnaise with no trans fat
- 1 tbsp salad dressing, cream cheese
- 2 tbsp reduced-fat salad dressing, cream cheese
- 1/8 avocado
- 1-2 tsp (1/2 oz) most nuts
- 2 tsp peanut butter

### Conclusion

A healthy diet should include at least three to four meals or six small meals each day. A day should begin with a healthy breakfast in order to practice good habits for a balanced diet. Including a good lunch is essential to have energy to stay alert. A healthy dinner is necessary to establish as a routine for your lifestyle and for your family. Snacks can be helpful to satisfy hunger and increase the nutrients consumed each day.

With busy schedules, it may seem like there's no time to eat healthy. Meal planning is very important and can prevent you from skipping meals, which causes fatigue and overeating at the next meal or snack.

## Tips for Healthy Eating

- Ignore fad diets that recommend cutting out an entire food group.
- Stop eating when feelings of fullness occur.
- Eat slowly.
- Drink plenty of calorie-free beverages.
- Get plenty of fiber from fresh fruits, vegetables and high fiber starches.
- Keep healthy food choices around and get rid of unhealthy food choices.
- Limit simple sugars, high fat foods and alcoholic beverages.
- Eat only ½ of the portion served at restaurants.
- Make a shopping list of healthy foods before traveling to the grocery store and stick with the list.

A healthy diet should incorporate variety and be thought of as a lifestyle rather than a temporary change. Make foods interesting by trying different spices, salsas or modifying a favorite recipe to make it healthier. Changing to a healthy lifestyle does not have to happen quickly. It is okay to take small steps and gradually change as long as the changes happen.

Food Group	Foods Recommended	Foods to Avoid
Meats and Beans	Skinless poultry, fish, pork loin, extra lean ground beef, beef sirloin, beef jerky, eggs, dried beans and peas, natural peanut butter and nuts	Fried, breaded, high-fat meats; skins of meat; dried beans/peas cooked with lard or other fatty meat
Grains	Whole wheat tortilla, whole wheat bread, brown rice, whole wheat pasta, oats and other high fiber starches	All refined starches (made with white flour) or carbohydrates with added sugar and/or high fat
Fruits	Fresh, unsweetened frozen or canned fruits in juice or water; 100% fruit juices; dried fruits	Fruits canned in syrup
Vegetables	Fresh, frozen or low-sodium canned vegetables; 100% vegetable juices	Regular canned vegetables
Dairy	Low-fat cottage cheese, reduced-fat cheese, low-fat and no added sugar yogurt, sugar-free pudding, skim or 1% milk	Whole milk dairy products and dairy products with added sugar
Oils/Fats	Small amount of canola/olive oil, avocado, olives, low-fat salad dressings, low-fat sour cream, low-fat mayonnaise, light cream cheese, light margarine	Lard, shortening, butter, regular mayonnaise, sour cream, salad dressings, cream cheese, butter
Beverages	Sugar-free beverages, sugar-free popsicles, sugar-free gelatin, and small amount of coffee or tea	Alcohol, sugar sweetened drinks and large amounts of caffeine

# OAC Membership

*Building a Coalition of those Affected*

## About OAC Membership

The OAC is a grassroots organization and was created to bring together individuals impacted by the disease of obesity. One of the first steps to getting involved and making a difference is to become a member of the OAC.

Membership allows the OAC to build a Coalition of individuals impacted, bringing a unified voice in obesity. These are the individuals that make up OAC's membership:

- Those who are currently struggling with their weight, whether obese or morbidly obese
- Those who are seeking treatment for their obesity
- Individuals who have successfully and/or unsuccessfully treated their obesity
- Friends, coworkers and family members of patients
- Professionals whose work is dedicated to those affected
- Organizations that support efforts in obesity

You probably find yourself fitting into one of the categories above. This is because obesity affects just about every person in the U.S. and directly impacts more than 93 million Americans. With this number continuing to grow, so must our voice. And that is where **YOU** become an important part in what the OAC strives to do.

## Membership Categories and Benefits

The OAC wants **YOU** to be a part of what we do. No matter how you're impacted, having individuals join our efforts who believe in making a difference is essential. That's why the OAC offers various member categories, so you can get involved at your desired level.

Several valuable benefits also accompany your OAC membership, including an annual subscription to OAC News. Each membership category offers something different. To learn more about membership benefits, please visit the OAC Web site at [www.obesityaction.org](http://www.obesityaction.org).

### *Not ready to join the OAC as a paid member?*

You can become a "Friend of the OAC" and still have your voice be heard. When joining the OAC in this category, you can get involved in our efforts while receiving electronic benefits. There is no charge to become a "Friend of the OAC." To sign-up, check the box below and complete the application.

Sign me up as a "Friend of the OAC"

# Membership Application

Yes! I would like to join the OAC's efforts.  
I would like to join as a/an:

- Patient/Family Member: \$20
- Professional Member: \$50
- Physician Member: \$100
- Surgeon Member: \$150
- Institutional Member: \$500 (*Doctors' offices, surgery centers, weight-loss clinics, etc.*)
- OAC Chairman's Council: \$1,000 and up
